

ALI HAMZEHLOUI

ARCHITECTURAL GRADUATE

AUSTRALIAN PERMANENT RESIDENT

Sydney, Australia | +61 478 010 748 | Hamzehloui.ali@gmail.com | LinkedIn

PROFESSIONAL PROFILE

Master of Architecture with 2.5+ years of Australian experience in architectural documentation and project coordination. Proficient in AutoCAD and working with Revit, with experience delivering coordinated drawing packages in accordance with the NCC and Australian Standards. A collaborative and detail-oriented professional committed to producing practical, high-quality design solutions.

CORE CAPABILITIES

- Concept design, design development and construction documentation
- Revit and AutoCAD drafting, modelling and drawing coordination
- Architectural visualisation, presentations and design communication
- Site inspections, RFIs, revisions and construction-phase support
- Advanced understanding of the BCA and Australian standards
- Quality assurance, document control and deadline management

PROFESSIONAL EXPERIENCE

GTS Company

2025 - Present

Draftsperson - CNC Manufacturing | Sydney

- Produced detailed technical drawings for customised architectural glass systems.
- Coordinated with production teams to ensure accurate interpretation of construction documentation.
- Maintained drawing quality and resolved technical issues throughout production.
- Worked closely with project managers and fabrication teams to deliver accurate project outcomes.

D&M Consulting

2024 - 2025

Architectural / Structural Drafter | Sydney

- Produced detailed construction documentation for residential developments in accordance with Australian Standards and NCC.
- Coordinated with engineers, surveyors and builders throughout project delivery.
- Prepared and revised documentation following RFIs and consultant feedback.
- Delivered more than 100 drawing packages for residential projects.

Ravagh Construction Company

2014 - 2024

Senior Architectural Graduate / Documentation Lead | International

- Led architectural documentation from concept and design development through approval and construction stages.
- Prepared coordinated plans, elevations, sections and council submission packages using AutoCAD.
- Collaborated with project managers, builders, clients and consultants to maintain design alignment and resolve project issues.
- Conducted site visits to review construction against approved documentation and supported construction-phase queries.
- Created 3D models, walkthroughs, renderings and animations to communicate design intent and support client approvals.
- Prepared project reports covering compliance considerations and design improvement recommendations.
